

REVIEW
FOR THE EDUCATIONAL AND SCIENTIFIC PROGRAM "CULTURE SCIENCE"

In 2016, Kharkiv State Academy of Culture launched the educational program "Culture Science" based on postgraduate studies majoring in culture science. Many Chinese citizens studied in graduate school under the new educational program. The program is available to foreigners due to the large number of hours devoted to learning the Ukrainian language.

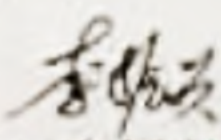

The educational and scientific program "Culture Science" is a program of a wide profile. It provides general knowledge of the history and theory of the world culture and methodological skills of working with culturological material. Due to this, graduates of various humanitarian and arts specialties can study under the program. Uptake of the content of the educational program "Culture Science" allows to summarize knowledge gained at the "bachelor" and "master" educational levels. After completing the program at Kharkiv State Academy of Culture, there are all opportunities to defend a doctoral thesis.

The educational program "Culture Science" fundamentally prepares applicants for higher education to teach in higher education establishments.

Highly qualified specialists are involved in teaching, including those who are well acquainted with the specifics of Chinese culture (Prof. S. Rybalko).

Technical base of Kharkiv State Academy of Culture fully allows foreign graduate students to study remotely.

The educational and scientific program " Culture Science " can be recommended for training of foreign citizens.
